EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The abstract has been replaced with

--This invention relates to a process of producing C2- to C4-olefins from steam and a feed mixture containing C4- to C8-olefins, wherein the feed mixture containing steam is introduced into a reactor with an inlet temperature of 300 to 700°C, said reactor comprising a bed of granular, form-selective zeolite catalyst, and wherein a product mixture containing steam and C2- to C4-olefins is withdrawn from the bed and is passed through at least one cooling means.--.

The following is an examiner's statement of reasons for allowance: the closest art of record Patel et al (4,743,357) discloses a process of converting a feed containing heavy hydrocarbon and water in the presence of a catalyst to a product containing lighter hydrocarbon and water. The product and the feed of the Patel process is heat-exchanged. However, Patel is totally silent as to (1) what kind of hydrocarbons in the feed and the product are, (2) the inlet temperature of the feed, (3) compressing the cooled product, (4) compressing and cooled to condensate the water vapor, (5) expanding and evaporating the water condensate to produce steam for the reaction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thuan D. Dang whose telephone number is 571-272-1445. The examiner can normally be reached on Mon-Thu.
